

Annex E

Timeframe for Recommendations

A review of the mechanised/manual labour option should be undertaken, especially bearing in mind guidelines which spell out criteria for project design which include "labour intensive", "giving employment to refugees".

This should be undertaken urgently by the Appraisal Mission in Khartoum:
2-24 May 1988.

Discussions should take place between COR and UNHCR to establish ways in which information regarding the need for labour can be collected and speedily matched by workers seeking employment.

Such discussions should be initiated by UNHCR as soon as possible but especially during negotiation of the Work Plan in relation to the SKAP project.

Specific instructions should be given to the Field Officers (or other UNHCR Officers) connected to the settlements to strengthen or establish local institutions for the active participation of refugees in such matters as wage earning (and much else).

This is a critical UNHCR management need and becomes a necessity during preparation for implementation of the SKAP project. Training seminars should be provided by UNHCR for Field Officers and should include the proposed Officer to be placed in Gedaref.

Children should be encouraged to become involved in a National Tree Campaign. The development of a curriculum package should be produced for schools. On the context of a nationally-sponsored Tree Campaign (Agricultural Dept./Ministry of Information) these recommendations should be promoted by an NGO or Government Educational Research Bureau as soon as possible.
