

IFSW United Nations Commission

Main area of work at the UN: Health

Short description of work at the UN:

As a representative of IFSW at the UN in Geneva, I focus on social work and health. A deeper cooperation between IFSW, WHO and other NGOs active in the same field is essential to me. I believe that health is a human right and social workers can make an important contribution to the implementation of this right, especially for people living in poverty.

As a retired social worker, I can look back on 30 years of professional experience in an acute hospital. For several years I served as President of the Swiss Association for Social Work in Health Care.
